

## Six Employees Win Phillippe Awards

Six General Electric employees in five company locations, including one team nomination, have been selected as winners of the 1976 Gerald L. Phillippe Awards for Distinguished Public Service from the General Electric Foundation.

The winners are: Betty P. Brown, manager of professional relations for the Neutron Devices Department in St. Petersburg, Fla.; David Collins, senior engineer for Aircraft Engine Group Quality Control in Lynn, Mass.; Donald A. Davis, manager of the equipment development laboratory for the Major Appliance Business Group in Louisville, Kv.; the team of William L. Fitzpatrick, an electrician, and Gary W. Hurst, a machine attendant for the Photo Lamp Department in Mattoon, Ill.; and Charles W. Trabold, general foreman for maintenance and construction of the transportation Systems Business Division in Erie, Pa.

Among the nominees in the company for the Phillippe Award was Julian H. "Brad" Bradberry, Jr., (above, center). He was presented a framed certificate of nomination with congratulations last week by Nuclear Fuel Department General Manager Stuart G. Miller (above, right) and Jack E. Bergman, Manager of Quality Assurance.

## What's Ahead?

Want to know what lies ahead for GE employees? If you do, you're not alone. So, the corporate GE News interviewed hourly and salaried employees from some of GE's key businesses to find out what happened to them last year and what see ahead for their businesses this year. A special interview with Reg Jones, chairman of the board, on how GE fared in 1975 and what he sees ahead for the company in 1976 rounds out the issue.

To learn what happened and what's ahead as told by fellow employees, pick up a copy of the corporate GE News, scheduled for distribution here later this month.

## Bidding Open

Bidding is now open for a company-owned Garage Door Opening Mechanism which the company purchased to meet a need for a radio control device. That means the door mechanism, minus the radio control, became surplus material.

The mechanism is a model 654300 with a 1/3 horsepower motor drive unit. Some hardware for attaching the unit to the garage is missing.

Send bids to C. Keshler at M/C F67 by March 23.

## Number 4 In Jobs

Fortune magazine's listing of 500 largest corporations shows General Electric as number four in this country in providing jobs and eighth in sales, but only 227th in terms of profits as a percentage of sales.
